Projects

- **MEAN Stack Project: My Portfolio**
  This project is about building my Portfolio app with the help of Node.js its framework Express.js, Bootstrap, CSS3, HTML5 and MongoDB.

- **Major Project: Noise level monitoring with notification system**.
  It is basically a system with audio-frequency sensing capabilities that is controlled essentially by a Microcontroller in turn measuring, comparing and regulating audio signals. When the recorded Sound is proportional to the threshold value, notification to the supervisor is given through GSM module on his/her mobile phone. This all in bid to help in maintaining silence in the silent zones.

Interests

- Sports
- Console Gaming
- Reading
- Music
